# ARE YOUR **KIDNEYS DISEASED?**

If Any of Your Family, Either in This or Past Generations, Have Been Troubled with Kidney Disease Make a Test of Your Urine and Satisfy Yourself.

Miss Clara Arndt, Secretary of the Northshore German Club of Kenosha, Wis., Says that She Has Been Permanently Cured by Warner's Safe Cure.

Warner's Safe Cure, to begin with, is purely vegetable and contains no harmful drugs, is a most valuable and effective tonic, it is a stimulant to digestles and awakens the torpid liver, putting the patient into the very best receptive state for the work of the restorer of the kidneys. It goes right at its work, and does it with absolute method, preparing the tissues, soothing where soothing is needed, stimulating the enfeebled organs and healing at the same time. It builds up the body, gives it strength, and restores the energy that is or has been wasting under the baneful suffering of kidney disease.

In the morning put some urine in a glass or bottle, let it stand 24 hours; it there is a reddish sediment in the bottom of the glass, or if the urine is cloudy or milky, or if you see particles or germs floating about in it, your kidneys are diseased and you should lose no time, but get a bottle of Warner's Safe Cure, as it is

dangerous to neglect your kidneys for even one day. You begin with no symptoms more definable than by the term lassitude. You are languid, low-spirited, weak and flabby and a constantly drubbing ache in the small of your back. Then come chills, scalding and pains when you urinate and a frequent desire to urinate. Your appetite is nearly gone and your digestion is

Warner's Safe Cure allays the backache at once, improves the appetite, relieves and removes the pain and restores the patient to robust health speedily.

Miss Clara Arndt, secretary of the Northshore German club, composed of young society folk engaged in the higher study of the Teutonic language at Kenosha. Wis, writes a grateful letter, which is a fair sample of thousands written every week by people who have suffered with kidney disease and been cured by Warner's Safe Cure. Miss Arndt writes: "I know Warner's Safe Cure saved my life. Last spring I had a severe attack of jaundice. with other complications, caused by the diseased condition of my kidneys and liver, which laid me up for several weeks. I lost my appetite, became nervous and irritable, lost flesh and courage and found no relief until our druggiet advised me to try Warner's Safe Cure. The first bottle helped me, so I tried another, and then another, and inside of a month I was well and have enjoyed good health ever since. I gladly endorse Warner's Safe Cure.

Thousands of letters are received from grateful patients, who, like Miss Arndt, have been permanently cured by Warner's Safe Cure

closes with the debate.

of a complication of diseases which originated in the kidneys. FREE. As evidence of their complete confidence in Warner's Safe Cure as an absolute cure for all Jiseases of the kidneys, bladder, liver and blood, the manufacturers, Warner's Safe Cure Co., Rochester, N. Y., will send any one who writes and mentions having seen this liberal offer in this paper, a trial bottle of this valuable medicine absolutely free, postpaid, together with a medical booklet containing many convincing testimonials of wonderful cures. This is looked upon as a plain business proposition by the Warner Safe Cure Co., because they know that Warper's Safe Cure never fails to cure and that the sufferer with kidney disease who uses a trial bottle will realize that its effect is beneficial and will continue to use it until a cure is effected. The genuineness of this offer is fully guaranteed. All letters answered by regular practicing physicians and treated strictly confidential. You can get Warner's Safe Cure at any drug store; regular size, \$1.00 a bottle; reduced from \$1.25 a bottle. If your druggist does not have it write Warner's Safe Cure Co., Rochester, N. Y.

# CARRY THE DAY FOR DOGS and wonderfully made." The meeting

Newsboy Oraters Prove the Value of Canine |

Both Sides Relate Instances of Ant-Deeds Outshine the Bad.

Twenty-three little boys of asserted colors and nativity, most of them bootblacks or "newsics," assembled at the City Mission on North Tenth street Friday afternoon to listen to a debate, in which four of their number were to participate. The question was "Resolved, That the dog is an enemy rather than a friend to boys." It was decided in favor of the negative, the pro-dog side having, in the minds of three judges, produced the best argument

The lads seemed to enter into the spirit of the thing with gusto, though some of them were different on account of the pres- of his colleague in defense of the doctrine ence of two or three visitors. The addresses of one or two gave evidence of careful preparation. Considering that few ing when the house was on fire, thereby of them have gone to school or had the advantage of a home training, they behaved themselves admirably, attesting the little girl from the river just as she was confidence they have in Mrs. E M. Shin- going down the third time. rock, Miss Ora Shinrock, her daughter, and Miss Nellie McGee, who have long applied themselves earnestly to this child rescue found the \$4,000 rate nest in a lumber yard work. All are members of the Woman's Christian Temperance union, under whose direction the enterprise is conducted.

The organization which meets there every Friday afternoon for some "literary" work, to be followed by refreshments, calls itself the Boys' Temperance society. The meeting opens with a song. Then comes in which the elements of physiology, theology and hygiene are ingeniously blended; another song is added to the program, and then the teacher asks them for their motto, to which they an-

## **OLD PEOPLE**

Have a charm of their own when they are not weak and feeble, but hale and hearty, enjoying the sports and pleasures of youth though they cannot participate in them. The whole secret of a sturdy old age is this: Keep the stomach and organs of digestion and nutrition in per-The young man who does not think of his stomach will be made to think of it as he grows old. It is the "weak" stomach, incapable of supplying the adequate nutrition for the body, which causes the weakness and feeble-

ness of old age.
Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It makes the "weak" stomach strong, and so enables the body to be fully nourished and strengthened by the food which is

eaten.

"I suffered for six years with constipation and indigestion, during which time I employed several physicians, but they could not reach my case," writes Mr. G. Popplewell, of Eureka Bprings. Carroll Co. Ark. "I felt that there was no help for me could not relain food on my stomach; had vertigo and would fall helpless to the floor. Two years ago I commenced taking Doctor Fierce's Golden Medical Discovery and little 'Pelleta,' and improved from the start. After taking twelve bottles of the Discovery 'I was able to do light work, and have been improving ever since. I am now in good health for one of my age—60 years. I owe it all to Dr. Pierce's medicines."

Dr. Pierce's Common Sense Medical Adviser, in paper covers, is sent free on receipt of 21 one-cent stamps to pay expense of mailing only. Address Dr. R. V. Pierce, Buffalo, N. Y.

# NEEDS OF THE YANKEE NAVY

Secretary Long Gives Fullest Facts Concerning Uncle Sam's Ships.

VALUABLE AID RENDERED IN PHILIPPINES

Other Squadrons Have Been to Less Active During Last Year-Increase Needed of Officers and Men.

WASHINGTON, Nov. 15 .- A full report of he condition of the navy and of its needs for the future has been submitted to the president by John D. Long, secretary of the navy. The report is intended for the consideration of congress and where deirable legislation is recommended bills will be prepared embodying it for the convenience of the lawmaking body. The rehe various squadrons and is in part as fol-

The vessels of the Asiatic squadron, de-tailed for service in Philippine waters, have been employed in co-operating with our military forces, in maintaing an effective patrol of the various islands and in pre-venting the insurgents from receiving sup-plies of arms. Since the capture of Aguin-aldo, in which operation Vicksburg took a conspicuous part, the department has re-duced its force on this station.

The vessels in Chinese waters have kept in touch with the important ports on the China coast and with our forces operating on shore, until the evacuation of the Chi-nese capital by all but a legation guard, since which time they have been so dis-tributed as to readily co-operate in case of tributed as to readily co-operate in case of

Effetency in Asiatic Waters.

Efficiency in Asiatic Waters.

The efficiency of the squadron in Asiatic waters reflects credit upon the commander in chief and his squadron commanders. On July 15, 1801, in the presence of Rear Admiral Rodgers, second in command of the Asiatic station; of Rear Admiral Beardsiec, retired, and other naval officers, and of a large number of distinguished Japanese officials, a mounment was unveiled and dedicated at Kurihama, Uraga, Japan, marking the landing place of Commodore Perry on his historic visit to that country in July, 1853.

In the operations of the North Atlantic squadron the instruction of officers and men has received more attention during the last year than ever before. In addition to the usual evolutionary cruises slong the Atlantic coast and in West Indian waters, several of the smaller vessels have done important surveying work, and also been on hand to protect American interests along the South and Central American coasts. During the summer, fleet evolutions were had in Nantucket and Vineyard sounds, and practical experiments carried on to determine the facility with which naval guns up to 5-inch caliber can be landed. Shore fortifications for both gun and torpedo work were erected with the resources of the squadron and practical experiments in the matter of attack and defense conducted on sea and on shore.

The vessels of the South Atlantic squadron have cruised along the entire south Atlantic seaboard, in harmony with our commercial interests there.

In order to re-establish the European station, one vessel was withdrawn from the South Atlantic squadron. They are now cruising in the Mediterrancean.

The vessels on the Pacific have been in active service and have visited the import.

They are now cruising in the Mediterranean.

The vessels on the Pacific have been in
active service and have visited the important points on the Pacific coast. On account
of the great length of coast line, the necessity for protecting our interests in sections
where conditions are frequently unsettled
and the few vessels available for this station, they have been compelled to drill
singly instead of in squadron.

Apprentice and Training Squadrons. Apprentice and Training Squadrons.

President Busy with Pins.

At this juncture the instructors are supposed to step into the background to a certain extent and permit the boys to govern themselves, but this wasn't possible Friday. There was a hitch in the proceedings at the very outset. The president landscape of Antasset, but the Good.

Relate Instances of Antasset, but the Good.

President Busy with Pins.

At this juncture the instructors are supposed to step into the background to a certain extent and permit the boys to govern themselves, but this wasn't possible Friday. There was a hitch in the proceedings at the very outset. The president results for this work. The training vessels are kept cruising continuously, except for the short periods necessary for repairs and for supplies.

The necessor of the apprentice squadrons.

The wessels of the apprentice squadron have made the usual cruises to Europe and the West Indies, with beneficial results.

The method referred to in my last report of training squadrons.

The wessels of the United States, has proved out parts of the United States, has proved of training vessels of the apprentice squadrons.

The need of line on the comes steadily more pressing and in case it should become necessary to man all the vessels of our present feet the required number is not available and I recommend that the number of lieutenants be increased from 200 to 350 and that the limit of the number of junior lieutenants and ensigns

number of junior lieutenants and ensigns be made 80.

I concur with the chief naval constructor that there should be an increase in his corps. With more ships to build there must be more constructors.

Some increase in the corps of civil engineers is necessary in view of the great increase in yard and dock construction.

I cannot too carnestly call attention to the necessity for an increase in enlistments, a most important branch of the navy. As with the officers so with the enlisted men. The ships of the navy have been greatly increased in number, but commensurate steps have not been taken to provide the necessary crews for them. I recommend that the present enlisted force be increased by 3,000 men.

I recommend that the marine corps be increased by 750 men, as recommended by the general board.

Naval Academy. pointed out also the utility of shepherd James Van Avery (affirmative) told the story of a mad dog that bit an unoffending a itizen, causing him to commit suicide to wold the rables. He thought that dogs in the abstract are treacherous and ungrateful. Carl Frampton, president of the society bright little colored lad of 9 years, entered just in time to rally to the support of dogs. He said he knew of a dog once that aroused his master one night by bark-

Naval Academy. Favorable consideration is invited to the report of the board of visitors to this institution and to its recommendations;

1. That the first of "midshipman," which is full of historic associations, be restored and substituted for "naval cadet."

2. That the probationary course for naval cadets be reduced.

cadets be reduced.

Also to the report of the chief of the bureau of steam engineering, and to its two months ago, closed for the anti-dog side by referring to the soutch-beast that once drove a man away from his father's

bureau of steam engineering, and to its recommendations:

1. That an engineering experimental laboratory be established at the naval academy for the use of the cadets in their atudies.

2. That a post-graduate course of instruction in engineering be authorized.

Also the reports of the chief of the bureau of navigation and the superintendent of the naval academy and to their recommendations: the adherents of the negative side cheered

the adherents of the negative side cheered lustily and those of the other faction looked somewhat chagrined.

Only one girl was present, little Netties Simon, and she kept in a corner by herself and remained very quiet, for the antipathy of the Boys' Temperance society to girls is well known throughout the neighborhood. Every one who has applied for admission so far has been blackbailed. When the apples were passed at the close of the debate it was found that the supply was short, lacking one of enough to go around. A dozen voices shouted: "Hey, there Nettie! Give Sammy that apple! You ain't no member!" And the luckless Nettle had to yield the fruit, though, to her credit, be it said, she did it with good grace.

Only once in the year do the boys of this neighborhood approach the girls with a flag of truce, and that's about Thanksgiving of truce, and that's about Thanksgiving the said that has been put in operation with successful results.

truce, and that's about Thanksgiving time, when it is customary for them to give the girls a tea. Then about the boliday

I have again to call attention to the pressing need of a national naval reserve force from which to draw for sea service immediately upon an outbreak of war. This subject has received attention in previous reports and recommendations have been made for the enrollment and organization of such a national body, to be under the general direction of the Navy department and subject to the call of the chief executive in times of national emergency.

The results of the Spanish-American war were such as to assure everyone having

# One of the Best

**Full of Beauty** 

MANY FIELDS CONTRIBUTE TO the issue of The Illustrated Rec which will be out on Sunday. It will contain pictures of life in many quarters of the world, with articles of general interest besides the usual number of Illustrations and articles that pertain more peculiarly to the local field. Some of the features are:

#### Head of the Goulds-

For a frontispiece is produced an excellent engraving made from the latest photograph of George Jay Gould. Not much has ever been written about this energetic young man, who has doubled the great fortune his father left in his control, and yet has managed to live as quietly as any ordinary business man. Something of his characteristics is told in the sketch which accompanies the fi-lustration.

#### Memorial for Mckinley-

Nebraska has organized an auxiliary to the National association formed for the purpose of creeding a monument to the late President McKinley at his home in Canton. O. An article telling of the object, scope and personnel of the association and what plans are under consideration is accompanied by pictures of the Nebraska members.

#### Scenes from the Gridiron-

No game draws like foot bail in the fall. In no other game is there such deep partisan interest. It is the only game that has been kept purely amateur, and that this is so is due to the intense lealousy of players and people alike. The Bee has a splendid group of pletures, taken at the Nebraska-Missouri game, in which everybody will find something of interest.

#### Java's Immense Temples -

Frank G. Carpenter pays a visit to the wonderful ruins of the Buddhist temples in the interior of Java. These magnificent structures date back at least to the beginning of the Christian era and stand as forceful witnesses to the magnificence of the church of Buddha in Java before the Europeans penetrated the fareast. Illustrated from photographs taken at the great temple of Boro Boedoer.

#### Home Life of Pueblo Women --

Minnle J. Reynolds writes an interesting sketch of a visit she paid last winter to the New Mexican village of San Ildefonso, describing the life that has its existence there. This peep into the actual home of the Pueblos will be found instructive as well as entertaining. It is also illustrated.

#### Home for Millionaires -

In New York at present work-In New York at present workmen are putting up an apartment house whose occupants will
be millionaires and janitors.
This building will contain the
most expensive apartments in the
world, the cheapest suite being
held at \$2,000 a year, while the
rent ranges up to \$10,000. An excellent detailed description of the
building's wonders is given,
showing how even luxury may be
refined. An excellent illustration
of the building is given.

#### Many Other Features -

As usual every department of the paper has been carefully looked after. Among the personal nictures is one of the late Luther W. Oshern of Blair, who died so recently at his post at Apia, Samoa. There are other pictures of interest to all, as well as carefully written comment and well selected stories. As usual every department of the

# Out on Sunday The Illustrated Bee Order it Today

results.
The manufacture of smokeless powder The manufacture of smokeless powder has progressed satisfactorily, both at the government works and at those of private manufacturers. The department in June last ordered a board of naval officers and chemists to revise the specifications for the manufacture of smokeless powder and to draw up rules for its test, examination and storage both in magazines on shore and on shipboard, and specific instructions on these points have been issued throughout the service. In addition a general examination and chemical test were made of all smokeless powder in the naval service, and the results are satisfactory.

### Civil Service a Success.

of navigation and the superintendent of the naval academy and to their recommendations:

1. That no cadet shall hereafter be appointed whose age is under 18 or over 12 on October 1 of the year of entrance to the naval academy.

2. That the salaries of the civilian professors at the naval academy be revised.

3. That a training vessel be built for the naval academy sufficiently large to accommendate the entire corps of cadets.

I recommend that the number of cadets at the naval academy be increased 50 per cent, as recommended by the general board, and that there be appointed annually by the president ten at large.

Upon recommendation of the superintendent of the naval academy the department decided, in the interest of the convenience of candidates for admission as well as the government, to have examinations for admission to this institution conducted by the civil service commission at or near the homes of the candidates instead of at the naval academy as heretofore. The wishes of the department were cordially acquired to by the civil service commission at or near the homes of the candidates instead of at the naval academy as heretofore. The wishes of the department were cordially acquired to the department were cordially acquired to the department were cordially acquired to the department of the civil service commission, as amended by the civil service commission, as amended by the civil service commission, as amended by the president May 27, 1899, provided that foremen master mechanics, quarterment in charge and other men in charge at navy yards, should be appointed after competitive examination before a board of naval officers. The rules of the United States civil service commission, as amended by the president May 27, 1899, provided that foremen master mechanics, quarterment in the civil service commission, as amended by the civil service commission, as amended by the civil service commission, as amended by the civil service commission, sa amended by the civil service commission, as amended by the civil ser naval officers. The rules of the United States civil service commission, as amended by the president May 29, 1899, provided that all special mechanics and civilian assistant inspectors of work and material (including armor, armor piate, ordinance, marine engines, hulls, buildings, dredging, etc.) employed at navy yards, naval stations and at private shipbuilding and manufacturing establishments where work is done by contract for the Navy department, should be appointed after competitive examination before a board of naval officers, in the same manner as foremen, master mechanics, etc.

general direction of the Navy department and subject to the cail of the chief executive in times of national emergency.

The results of the Spanish-American war were such as to assure everyone having knowledge of naval matters that steps should at once be taken to meet the one certain and positive requirement which will face the nation upon an outbreak of wartime, if it comes, of a large increase in the men of the navy from an existing reserve—a in increase which must, in the main, be made from the seafaring class, who, having acquired the habit of the sea, are at home on the water. There is no better way of insuring such a reserve—a body to go to the front on board ship at once upon the outbreak of war, or when it is imminent.

Next to this will come the defense of the coast, and for such purpose the naval militia will be essential.

I see reasons for both organizations and have heretofore done all possible to aid the one now existing—the naval militia, and to convince congress of the necessity for the authorization of the other—the national naval reserve.

No Increase in Ordanance. Best Talent is Needed.

The following births and deaths have been reported to the Board of Health for the authorization of the other—the national reserve.

Su Increase in Ordnance.

No Increase in Ordnance.

No Increase in Ordnance.

No Increase in Ordnance.

No Increase in Ordnance.

Increase of the Navy

No Increase of the Navy

The navy today 's a far greater three.

Increase of the Navy

The navy today 's a far greater factor in our relations with the world than it was before the recent national expansion which now includes Forto Rico. the Hawalian islands the vast area of land and sea in the Philippines and our obligations to Cuba. If we are to have a navy at all it mental on the relations with the world than it was before the recent national expansion which in the philippine and our object to go the form of the o

their manning, exercise and maintenance.
The board on construction recommends:
Three seagoing battleships of about 16,000
tons trial displacement.
Two armoved cruisers of about 14,500 tons
trial displacement.
Six gunboats of about 1,200 tons trial displacement.
Six gunboats of about 600 tons trial displacement. six gunboats of about 200 tons trial displacement.
Two colliers of about 15,000 tons trial dis-placement.
One repair ship of about 7,500 tons trial

splacement. Six training ships of about 2,000 tons trial displacement.
Four picket boats of about 650 tons trial displacement.

Four picket boats of about 500 tons trial displacement.
Four tugboats.
All the vessels thus recommended are desirable in the prospective and harmonious development of our naval force. A larger increase than usual is also desirable in view of the fact that none was made last year. The department also recommends:
Three first-class battleships, two first-class armored cruisers, three gunboats, each of about 100 tons trial displacement, three gunboats, each of about 200 tons trial displacement, for insular service; three picket boats, each of about 500 tons trial displacement; three steel sailing training ships, each of about 200 tons trial displacement, three steel sailing training ships, each of about 200 tons trial displacement. The department will submit to congress in December next, as directed by the last in properties of two sengoing battleships and two armored cruisers, according to which the battleships and cruisers above recommended should be built if appropriation is made therefor.

should be built if appropriation therefor.

In making this report I take pleasure in acknowledging the efficient and zealous service of the assistant secretary, of the chiefs of the bureaus and offices of the department and of the officers and men generally of the navy and the marine corps on shore and affect, as well as of the dividing force.

JOHN D. LONG,
Secretary of the Navy.

#### CART AHEAD OF THE HORSE What Peddler Goldberg's Vehicle At-

tempted to Do Coming Down Hill. Sam Goldberg, a peddler living at Tenth

and Bancroft streets, met with an accident yesterday while driving his wagon down the Dodge street hill, between Nineteenth and Seventeenth streets. The brake refused to work, causing the heavily-loaded wagon to run forward upon the team with such force that one of the hold-back straps was broken and the tongue fell to the pavement The team was then powerless to check the impetus of the wagon and Geldberg was unable even to guide it, so for two blocks there was as precipitate and dangerous : runaway as any boy could wish to see.

It wound up with a crash and a shower of flying splinters in a stone pile by the new wing of the federal building. One of the horses was cut on the sharp stones; Goldberg sustained two broken ribs and the wagon was demolished.

#### WOODMEN COMING TO OMAHA Lincoln Craftsmen Will Visit Their

Gate City Brethren in Force.

The united camps of the Modern Woodmen of America of Omaha are making arrangements to entertain a large delegation of visitors from the camps of Lincoln, who will arrive at 8 o'clock this evening.

A large delegation of the Omaha Wood men will meet the visitors at the depot and accompany them to the hall at Sixteenth street and Capitol avenue, where a regular session of the camp will be opened. A drill team from Lincoln will exemplify the floor work. After the regular work refreshments will be served and a reception given the visitors. The Lincoln delegation will be accompanied by A. R. Talbot, head camp director, and Head Consul Johnson.

PENSIONS FOR WESTERN VETERANS.

Woman Dies: He is Saved. CLEVELAND. Nov. 15, 1901.-A woman the world for their wonderful efficacy in banging in mid-air, screaming in agony, cases of this kind. They have cured when held the gaze of hundreds of horror-stricken the trouble was as severe as Mr. Bell's and people who had gathered near the Wright fail. Acting directly on the nerves and they cure lesser nervous disorders without blood, they are an unfalling specific for Attracted by a slight fire in that vicinity, such diseases as locomotor ataxla, partial number of employes and others got on the paralysis. St. Vitus' dance, sciation, neuroof of the building to see the blaze. Ida ralgia, rheumatism, nervous headache, the Jantz, was one of the number and, while after-effects of the grip, palpetation of the looking over the coping, unthinkingly took heart, pale and sallow complexions and atl forms of weakness either in male or female. (they are never sold in bulk or by the bun-School Director Thomas H. Bell, was near dred; by addressing Dr. Williams' Medicine

and saw the weman's terrible predicament, Company, Schenectady, N. Y. These pills The only way he could reach her was by a are not a purgative and contain nothing window overlooking Ontario Street, and to which could injure the most delicate systhis he rushed. He climbed out and up a tem. fire escape till be was opposite the woman.

who by this time was unable longer to cry reached out and with great effort raised her from the wire until she was within reach of those above who lifted her sense-

less form over the coping. But, when the strain was over, Bell's foo slipped. To save himself from a frightful fall to the pavement he grasped wildly and fell across the same wire from which he had just rescued the woman. The shock rendered him powerless to move and he hung there belpless while the silent, deadly current burned into his flesh. No one was brave enough to attempt his rescue and it was several minutes before the current was turned off, and he was removed to a place of safety.

The woman died but Mr. Bell was taken to the General Hospital, where the doctors found him suffering from a very severe pervous shock in addition to being fright fully burned. A few days later he was removed to his home where he was confined for eleven months. During the first three months of his illness it was found necessary to resort to skin grafting in order to heal his wound. His friends responded and over three thousand pieces of skin were used to cover over the raw flesh. In speaking of his restoration to health, Mr. Bell said to an interviewer:

"My recovery from the dreadful shock, of course, was slow. I suffered untold fortures. My nervous system was a complete. wreck: I had spells of dizziness, and, when I attempted to walk, a numbness came over my whole body. My sleep was not at all restful or natural and I always awoke tired out. My appetite was poor and at times I suffered from violent nervous headaches. The powerful electric abook had undermined my whole system. In spite of the doctor's care I didn't seem to improve. I had been idle a whole year and grew auxious to return to my work, but my condition remained so bad that I was very much discouraged and feared I would never regain my health "I heard of a case similar to mine which Dr. Williams' Pink Pills for Pale People had cured. Then I determined to try this medicine. By the time I had taken half the second box I could notice a marked improvement. The headaches disappeared, my nerves became steadler and I slept well. I took the pills for a month and after I resumed my work I continued till I was perfeetly well. They certainly did wonders for me and I take pleasure in recommending

The above is a plain, straight-forward statement of facts. The horrible incident occurred on the evening of June 17, 1895, and the story of it was published by the newspapers at the time. The sequel, which is known to many, and is told in Mr. Bell's own words, cannot be doubted. He is well known in Cleveland, not only through his prominence in school matters, but as a hero-the man who risked his life in a vain attempt to save a woman from a

terrible death. Mr. Bell's accident was not one of the sort which falls to the lot of many people but the results that followed were the with which thousands of persons are afflicted. Only in his case they were unusually severe. His nervous system was wrecked-almost beyond repair-and no medicine did him any good until he tried Dr. Williams' Pink Pills for Pale People They cured him.

# out. On a level with the roof. Mr. Bell We Forgot To Say

in our Wednesday's ad that our goods are all priced strictly in accord with their actual value. You can go into our stores in New York or Los Angeles or Portland, Oregon, or in any place between them and you will find the some price for the same piece of cloth in every one of them. We give as much value for the money as we can, and you can figure out for yourself, if buying goods as we do for twenty large stores at a time, we can give more value in woolens and trimmings than the tailor that buys for one

small. If you were selling goods couldn't you afford to sell them cheaper to a customer who bought ten thousand dollars worth at a time than to a man who bought one hundred dollars worth? Now you can see that our talk of better goods for less money than the other fellow can give is not brag or nonsense, but a plain business proposition.

We sell suits from \$20 to \$50 and our price is determined by the cost, and not by the customer's appearance Mr. Paffenrath is still away, but come and see the other fellows at

same, in kind, as the many nervous troubles Karbach Block. 209-11 So. 15th St.
